12TH INTERNATIONAL PACKAGING EXHIBITION AND CONFERENCE

Co-located with

FOODTEK
8th Exhibition and Conference on
Food Processing and Packaging **2012**

PHARMAPACK
5th International Exhibition & Conference on Pharmaceutical Packaging

23 - 25 February 2012 ♦ Hall 6, Bombay Exhibition Centre, Mumbai, India

Mark the Dates

Visit India's Largest Packaging Exhibition

Meet 200+ Companies from across 6 Countries Showcasing the Cutting-Edge Technology

See Live Demonstration of over 300 Machines and Equipments

Bombay Exhibition Centre will once again host Intelpack-2012 co-located with Foodtek-2012 and Pharmapack-2012 in Hall 6 of the Bombay Exhibition Centre, Mumbai, India from 23rd to 25th February 2012.

Organised by Intel Trade Fairs & Expositions Pvt. Ltd., India's leading organisers of Business-to-Business exhibitions, on a floor space of over 10,000 sq. mtrs. (1,00,000 sq. ft.), and now in its 12th Edition, Intelpack-2012 co-located with Foodtek-2012 and Pharmapack-2012 will feature more than 200 exhibitors from around 6 countries showcasing the cutting-edge technology in machinery, material, systems and products.

No other show brings you more technology and solutions than the Triple Expo of Intelpack-2012, Foodtek-2012 and Pharmapack-2012. It is the one place to connect with world-class packaging companies whose top priority is finding you the right solution to make your business more efficient, more dynamic and more profitable.

Discover solutions to reduce costs, increase productivity, increase efficiency

that helps you build better brands in the highly competitive market place. It's your chance to meet the entire packaging industry suppliers and service providers under one roof.

The Mega Triple Expo will see several world class companies presenting the cutting-edge technology in processing and packaging, some for the very first time. Innovations, product launches, state-of-art solutions are all the high point of the exhibition.

If you are planning to upgrade your machinery or equipment to stay on the competitive edge or looking to expand your production facilities, then Intelpack-2012 is the most upmarket and technologically superior packaging exhibition in India. The show also presents the finest opportunity to meet with your existing suppliers and to source for new ones. It is also the best place to meet and discuss with packaging professionals and find the best packaging solutions that can drive your business forward.

"Intelpack is the oldest and most successful packaging exhibition and the list of exhibitors reads like who's who

from the packaging industry. With over 200 exhibitors and more than 350 products to see, we are sure Intelpack-2012 co-located with Foodtek-2012 and Pharmapack-2012 will attract large number of business visitors from all over India and overseas. It is a must visit exhibition for every packaging professional and everyone who has anything to do with packaging development in their organisation. I am sure, the triple expo will be a well attended show" says Aditya Ashok, Head - Marketing & Sales, Intel Trade Fairs & Expositions Pvt. Ltd.

No other exhibition in the region will get you so many companies and numerous solutions under one roof at one time. Intelpack-2012 is a must visit exhibition for everyone connected with packaging and for every industry sector.

Intelpack-2012 co-located with Foodtek-2012 and Pharmapack-2012 surely promises to open your doors to a host of profitable ventures. Be it getting to know who is active in the market, clinching best deals or simply browsing through the wide range of products... the reasons to be at the show... are just endless.

Register Online

Register to visit before 10th February 2012 for the following benefits:

- ⇒ Avoid long queues at the venue as your Visitor Badge will be sent to you in advance
- ⇒ Receive information about special offers and launches by exhibitors
- ⇒ FREE Exhibition Directory

Wraptech Machines Pvt. Ltd.

WRAPTECH is proud to be one of the leading manufacturers & Exporter of packaging machines for nearly two decades. Wraptech Machines will be launching their new Multilane FFS Machine and their Flow Wrap Machine at the IntelPack-2012.

We Offer a wide range of Vertical form fill seal machines, with wide range of Dosing systems to meet your specific product requirement. The filling range is from 0.5 to 5000 grams and output from 12 to 600 ppm, depending upon

the fill weight and machine configuration. Our core strength is to find customized packaging solutions.

On Show at IntelPack-2012: MB 150 Multi Track machine (10 lanes) with Slide Filler, MB 25 High speed Bagging machine with Auger Filler and Horizontal Flow wrap machine

Meet us at Booth No. A-1

Pakona Engineers (India) Pvt Ltd

Pakona Engineers (I) Pvt Ltd. is an ISO 9001 certified company is one of India's leading manufacturers of packaging machines and equipments. Pakona Engineers will once again showcase their range of packaging machines at the IntelPack-2012.

Pakona offers a wide range of packaging machines for all consumer products. Our machine produce innovative packages like Stand-up pouches (with & without spout) Zipper pouches, Straw applications, Attractive shaped pouches, Quadro seal bags, Side gusseted pouches, Square bottom bags, pillow pouches & many more.

Pakona will showcase their widest range of flexible packaging machineries are: Horizontal Form/Fill/Seal Machines, Vertical Form/Fill/Seal Machine, Bulk packing machine,

Container Filling Line, Cartoning Machines & Palletizers.

We have world-wide export to 70 countries and we assure long lasting performance and 100% satisfaction

Meet us at Booth No. L-3/15

Wenglor Sensoric India Pvt. Ltd.

Wenglor Sensoric India Pvt Ltd is a 100% own subsidiary of wenglor sensoric gmbh, incorporated in 2008, its a proud addition to the fleet of other 40 subsidiaries across the globe. The company always believed in to be present at the places where our customers need us the most to provide them with better service and comprehensive international support, hence with our H.O at Navi Mumbai

we are supporting regions like Pune, Gujarat, Chennai, Bangalore, Delhi and many more. The company's products for industrial applications are diversified into photo electric sensor, Inductive proximity switches, barcode scanners, Safety technology, Vision sensor for contactless object detection.

Meet us at Booth No. C-4

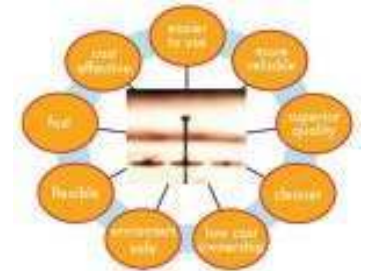

Condot Sytems Pvt. Ltd.

Condot Systems Pvt. Ltd. is the only company in India that can cater to the entire range of Variable Data Printing and Package Coding requirements with innovative solutions that come with a host of built-in security features. No wonder, the company, recognised as the 'ambassador' of the world renowned TIJ Technology in India, is the fastest growing one in terms of customer base. And it will be the first

company to have a network across Asia- Pacific and Africa.

With 80 different Packaging and VDP applications and more than 2000 different production lines, the company leaves no stone unturned to exceed the expectations of its huge customer fraternity, which has crossed

the 5000 marks. An achievement in itself that speaks volumes for the company's technical capabilities and it is precisely this technical strength that will enable Condot to capture the Asia Pacific and Africa within just a few years hence.

Meet us at Booth No. B-1

Hilda Automation

Hilda Automation will be showing for the first time in India, their newest range of Fully Automatic BOPP (Hotmelt) Labeling machine and Fully Automatic Shrink Sleeve Labeling machine.

Hilda will also be showcase their other range of filling and packaging machines on a floor space of about 1000 sq. ft.

Hilda's Fully Automatic BOPP (Bioxylene Poly Propylene) Labeling machine: This machine is used particularly for labeling PET bottles which are being used in packaged drinking water industries for PET bottle. This machine which is fully automatic puts labels on the pet bottle

Motovario Group, Italy

Established in 1965 in Formigine, at the heart of the Modena industrial district, Motovario has grown to become one of the most important Italian and European manufacturers of gear units for industrial and civil applications.

The main production work is carried out in the establishments of Formigine and Ubersetto, with 50,000 square meters of facilities and a staff of around 500.

Motovario Spa together with its 9 branches, has proved its capacity to grow in step with the swings of the market, giving itself a flexible structure and consolidating its place as a market leader in its sector.

Meet us at Booth No. L-38, M-25

with the help of hotmelt glue unit (Robatech make-Switzerland) which sticks the two edges of the labels. The basic positive point of the machine is it runs on very low power compared to other conventional brands, very high speed of production i.e. 60-300 BPM, less adhesive glue is required (As it sprinkles only 6 dots on the label) and no basic cleaning or maintenance is required. And so because of these all features it is widely accepted in the packaging industry as it reduces the packaging cost with no maintenance.

Hilda's Fully Automatic Shrink Sleeve Applicator machine: This machine automatically applying sleeves on the bottle. The sleeves are in the roll form which are later cut as per need and applied either on the neck, centre or on full body of the bottle. Later this sleeve applied bottles are passed into a heat tunnels so that the sleeves are shrink to the bottles. The best part of this machine is you can run the machine at very high speed like 150

type & Laminated Film type

- Shrink Sleeve Applicator (100BPM & 200BPM) for Body & Neck Sleeving
- Labelling machines - Single side, Front & Back, Wrap Around & BOPP- Hot melt
- Shrink Tunnel
- Shrink Wrapping machines - Fully Automatic & Semi Automatic

Meet us at Booth No. B-2

Fuji Impulse Co. Ltd., Japan

Fuji Impulse Co. Ltd. will be exhibiting their range of Impulse Sealers for the First Time in India and IntelPack-2012.

Since 1956 FUJIIMPULSE's goal has been to engineer products for the people who actually use them. We strive for excellence and high quality through continuous development of our own technologies in order to meet the stringent requirements from our customers from around the world.

In the name of Mt. Fuji, which is the

tallest mountain in Japan and world-famous brand, our challenge is to create world class sealing products that serve the medical, food, high-tech and general industries.

On show at IntelPack-2012 will be Table-top Impulse Sealer, Foot-Operated Impulse Sealer, Semi-Automatic Table-top, Impulse Sealer, Impulse Vacuum Sealer

Meet us at Booth No. P-8

Showcasing the Widest Range of Packaging and Processing Machines, Equipments, Systems & Products

Ishida India Limited

Ishida India and Heat and Control South Asia Pvt. Ltd., will once again be presenting their State-of-Art Packaging and Processing Machinery at IntelPack-2012.

Ishida India is a 100% subsidiary of Ishida Co. Ltd. Japan, world's largest manufacturer of various Weighing Systems.

Team Ishida would be providing complete weighing, packaging & Inspection solutions to various industries like Pharmaceuticals, Snack Food, Sea Food, Poultry, Fertilizers, Frozen Food Products, Detergents and Chemicals etc.

Our Product line Includes: Multihead Weighers, Packaging Machines, Tablet counting & Filling Machines, Online Inspection Systems, Electronic Weighing Scales/Balances

Today Ishida is a well known & respected name in the global market for Weighing, Packaging & Inspection

systems. Apart from Japan, we also have manufacturing facilities in Korea, China, U.K. & Brazil. Ishida also marks its global presence through its offices in Malaysia, Thailand, Middle East, South Africa & USA apart from it's

various Sales Associates across the globe.

Ishida India Pvt Ltd is based in Gurgaon in Haryana and we have our Sales & Service set up with qualified & trained engineers to provide immediate service backup to our esteemed customers.

Meet us at Booth No. A-5

Banner Engineering India Pvt. Ltd.

Banner Engineering is engaged in manufacturing Photoelectric,

Productivity Indicator Lights, and Encoders.

Banner Engineering is a company founded in 1966, having its Headquarters in Minneapolis, MN, USA. We started out as a custom electronics engineering firm building control panels. Banner Engineering made a commitment to become an innovator in photoelectric sensing. From this commitment came the national leader in Sensor Technology. Over a 15-year period, Banner Engineering has placed first in more than 50 consecutive independent studies of engineers' purchasing preferences in the US. This preference has led to leading market share results.

Ultrasonic, Laser and Machine Vision Sensors, Machine Safety Products, Wireless Network Products,

Meet us at Booth No. F/1

NIDO Machineries Pvt. Ltd.

NIDO Machineries specializes in the manufacturing, distribution and servicing of a comprehensive range of Filling & Packaging Machines in India. With operations in 3 countries, installations in over 12 countries and over a 100 satisfied customers, NIDO

is one of the fastest growing companies in the field of Primary & Secondary Packaging Machines in India.

With an extensive stocking capacity of machines and spares, and well trained and experienced sales and service personnel, NIDO guarantees quick deliveries of customized and cost effective solutions with professional after sales service across India, Middle East and Africa. NIDO offers solutions not products. Come grow with us!

On Show at IntelPack-2012: VFFS machine with 10 head Multihead Weigher, 25kg Weighing Filling Machine, 2kg Powder Filling Machine, 1kg Volumetric Cups Filling Machine, 4 head Linear Weigher, 5kg sugar/rice Weighing Filling Machine, Horizontal Flow wrapper, Electric Reel Handling Stacker from TAWI - Sweden

Meet us at Booth No. H-20/J-7

CONCETTI S.p.A., Italy

The Concetti Group specializes in manufacturing weighing, bagging, closing and palletizing machinery for bulk products. Its extensive experience in this field means that customers can take advantage of the added value offered by multipurpose and reliable automation using the most innovative technologies in both the mechanical and electronic fields.

This great versatility has allowed the Concetti Group to make truly distinctive machinery, satisfying the requirements of advanced and diversified customers in numerous industrial fields such as the animal feed, milling industry, chemical and cement products for the building industry.

Meet us at Booth No. G-10

Maple Gourmet & Industries Pvt. Ltd.

We are one of the Quality Packaging Machinery Manufacturer, International Distributor and Service Provider in India for a wide range of packaging machinery product Like Pack Fill & Seal, Solo and Multi Tray Linear Weight Filler, Tstix, Minipak, Funnel Pack, FFS, Band Sealers, Shrink Tunnels, Vacuum Pack, Blister Pack and Many More.

Maple Group was established in 1991. We engineer global technology into customized innovation customer oriented products for processing, primary and secondary packaging needs to make brand speak.

The State-Of-The-Art Atelier at Surat and five regional offices all over India for servicing customers are well equipped to cater to the global benchmark for customer specifications. We are a team of dedicated professional with International tie-ups for global sourcing. Our customizing packaging solution philosophy works on the PDQS (Price

Delivery, Quality, and Service) with an apt global technology to make your brand create effective performance.

Meet us at Booth No. E-2

Besides selling packaging Machinery, we also understand your processing and branding needs our Atelier customizes solutions for your products. Our Atelier is a team of connected expert professionals with a legendary inheritance of two decades in innovating packaging solutions, with an in depth understanding of the ever changing market. We stimulate a customized difference to your market share.

360 degree processing and packaging solutions from our Atelier are a benchmark of excellence in cost, Application and customer satisfaction for others to follow.

Valco Melton Engineering India Pvt. Ltd.

As a world leader with almost 60 years experience in adhesive application

systems, Valco Melton offers the latest in hot melt and cold glue dispensing

solutions. For the packaging industry specifically, Valco Melton features the highest quality industry standard compatible hot melt tanks and parts and offers a complete range of proven equipment options— including solutions for sift-proof closure, ribbon and precision coating or laminating systems, case and carton sealing, bag forming and sealing, and pallet stabilization. With support from over 70 countries worldwide, Valco Melton is guaranteed to meet the needs of every packaging application.

Meet us at Booth No. H-3

Bhavmark Systems Private Limited

Bhavmark Systems Private Limited (BSPL), Established in the year 2002, renowned manufacturer, importer and distributor of printing machines, printing equipments. We are backed by a team of diligent professionals and have sophisticated machines &

equipment to come up with qualitative and innovative range of products.

Through our dedicated efforts, we have been able to enter into tie-ups with industry leaders like HITACHI-Japan & Rea jet – Germany.

On Show at IntelPack-2012: Ink Jet Printer PH Model – The IJ printer is capable of marking and coding various product materials such as metals, plastics, rubbers, films and papers.

Rea Jet HR – The coding and marking system based on HP-Print technology.

Fotonica Laser Systems – are used in a wide range of industries, such as: Food and Beverages, Pharmacy and Cosmetics, Automobile Industry, Electric Material and Electronics, Wood Industry.

Furus Packaging Pvt. Ltd

Furus Packaging Pvt. Ltd., an ISO 9001:2008 company, is the pioneer in the manufacturing of Polyester (PET) Straps in the Indian sub continent. Furus Packaging Pvt. Ltd. manufactures polyester strapping under the PARSTRAP™ brand name.

Polyester Strapping & Strapping Tools Safe, Flexible, Cost Saving Solution to secure your goods. PARSTRAP™ is an innovative Packaging Product, not only because it is fully recyclable but also because it has the heavy loading characteristics of Steel Strap and the elasticity of Polypropylene (PP) strap.

PARSTRAP™ is available with embossed as well as plain surface. You also have the choice to print your company name and logo on the strap. This would serve as an added advertisement route to promote your company image. Applications Of Parstrap™ are Unitization & Palletization, Bricks & Tiles, Baling Plants, Metal Industry, Glass &

Ceramic Industries, Paper Industry, Plywood

Manufacturing Units, Construction Materials Industry

Furus Packaging Pvt. Ltd., are the authorized agents in India for all strapping tools manufactured by ITATOOLS, Italy. We stock, supply, install, service and repair all ITATOOLS strapping tools. A dedicated, fully-equipped Tool Service Center in Mumbai, India provides tool repair and overhaul services. We also carry a complete line of all required spare parts.

Meet us at Booth No. L-26

Mold-Tek Packaging Limited

Mold-Tek Packaging Limited is a progressive ISO 9001-2008 certified company based in Hyderabad, India, involved in the manufacture of high quality plastic products. It was established in the year 1986 and has become a Public Listed (BSE:533080) Enterprise in the year 1993. Presently, we have 6 plants and 3 stock points spread across India to ensure on-time delivery.

Every product manufactured by Mold-Tek since its inception 25 years ago comes with a guarantee that it was created with unerring focus on online quality control and GMP practices. We are at the zenith of plastic packaging in India due to this commitment towards every product that leaves our plants with our stamp on it. We constantly update and use the latest mould and tool design concepts and

bring in new decoration features to improve aesthetics. Our latest innovation is the introduction of In Mould Label (decoration using robots.)

We developed IML decorated packaging for the first time in India which integrates decoration and labeling into the injection molding process producing outstanding picture quality and everlasting images.

In a growing sector like packaging, IML decoration would be the first choice to improve your brand image. IML decorated thin wall containers are suitable for storage conditions like microwave, dishwasher and the deep freeze. Mold-Tek has set up integrated IML solution with in house label manufacturing and cutting machines to enable quick production of IML labels. We also developed in-house

robots to cut down capital costs in order to ensure, Lowest prices for IML decoration, Quick delivery, customizability and maintenance, No chance of a stock out situation due to in house labels/mould maintenance.

Our position as market leaders in the plastic packaging industry is a result of various competitive advantages over other suppliers.

Meet us at Booth No. L-25

Pepperl+Fuchs India Pvt. Ltd.

Pepperl+Fuchs is a leading developer and manufacturer of electronic sensors and components for the global automation market. Continuous innovation, enduring quality, and steady growth guarantees continued success, since more than 60 years.

P+F products are developed to provide reliability and variety to suit most of the applications in the manufacturing environment. A host of companies in the manufacturing environment use P+F as a benchmark of quality for their own products and vendor accreditation. P+F products are widely used in a host of sectors like Machine

construction of all kinds, Pulp and Paper, Cement, Metals and minerals, Automotive, Material handling, Food and Beverages, Ceramics, Process controls, Gas and petrochemicals, Fertilizers and so on.

On Show at IntelPack-2012 : Inductive Sensor, Photoelectric Sensors, Capacitive and Magnetic sensor, Ultrasonic sensor, Incremental and Absolute Rotary Encoders, Vision sensor and solutions, Position Encoding System -WCS.; RFID, AS -Interface solution

Meet us at Booth No. M-30, P64/64

Osna Electronics Pvt. Ltd

Osna electronics Pvt. Ltd is in the business of Industrial automation products for the last 26 years. Its modern manufacturing plant in Okhla and its chain of ancillary units aims on repeatability of quality production and customer satisfaction.

Osna is one of the leading manufacturers of Inductive and dealing in wide range of German & Italian optical, color mark sensor (TLu011, TL46 TL 50), Label sensor (SR21 IR) form Datalogic Automation srl Italy, 3 color mark sensors, laser & white light color and contrast sensors, infra red sensors, background suppression Through Beam sensors, Retro-reflective sensors, Optical fibers cable & sensors, fork type sensors, vision sensors, paper break /edge detectors & ultrasonic sensors.

Osna Electronics will showcase their entire range of products that will include, wide range of vision sensors, 1D (Barcode) & 2D (data matrices) Code Readers, Color Mark Sensor (TLu011, TL46 TL 50), Label Sensor (SR21 IR), 3 Color Mark Sensors, Laser & White Light Color And Contrast Sensors, Infra Red Sensors, background suppression Through Beam sensors, Retro-reflective sensors, Optical Fibers Cable & Sensors, Fork Type Sensors, Vision Sensors, Paper Break /Edge Detectors & Ultrasonic Sensors.

Osna is authorized distributor in India of Datalogic Automation Srl, Italy and Sensopart GmbH Germany

Meet us at Booth No. F-3

Spectra Plast India Pvt Ltd

Spectra Plast India Pvt Ltd (was formerly called as Syatem Plaast), is specializing in manufacturing of Engineering Plastic, Conveyor & complete range of Conveyor Components. Our Company Specializes in the development, design & manufacture of Conveyor

Components for handling conveyors in all production stages from depelletizing through to processing, packing & palletizing. It has been partnering with customer for more than 10 years. We have our complete range of conveyor components & plastic components to machine builders & end use plants.

On Show at IntelPack-2012: Plastic Conveyor Components, Engineering Plastic Components Modular Beltings, Stainless Steel & Plastic Chains

Meet us at Booth No. Q-5

HabasiT Iakoka Pvt Ltd

The largest manufacturer of synthetic sandwich spindle tapes in the world HabasiT Iakoka Pvt Ltd is an Indo-Swiss joint venture company based at Coimbatore. Leather nylon sandwich belts are also manufactured here.

To cater to the needs of Paper, Printing, Packaging industry, we have a wide range of 'HabasiT' make flat power transmission belts, folder gluer belts, conveyor, modular, slat chain and timing belts. We do a lot of fabrication on these belts to meet out the exact

requirements of customers. We are also deputed our service personnel for joining of belts and maintenance at customers' site anywhere in India. We offer consulting and technical advice in designing of belts for various applications. we guarantee 'best value for money' in every application. With 23 dealers, three branch offices and excellent service network, 'HabasiT Iakoka' means international quality product with the best Indian Service.

On show at IntelPack-2012 :Conveyor belts, Folder gluer belts, power transmission flat belts, modular belts, chain, seamless belts, timing belts and wear strip"

Meet us at Booth No. G-1

VPG Transducers

VPG Transducers offers an extensive range of products through our Celtron, Revare, Sensortronics, and Tedea-Huntleigh brands. VPG Transducers'

commitment to Quality and Customer Service, coupled with a World-Wide network of Sales offices and Distributors, makes us the premier source for Weighing and Force measurement solutions across a wide range of industries.

The Packaging Industry is supported with a number of original designs including Damped load cells for High-speed weighing, Hermetically sealed Stainless-Steel versions for Food Processing applications, and special versions unaffected by Centrifugal forces for Rotary Filling Machines.

VPG can also support your future developments with their International R&D teams.

Meet us at Booth No. L-10

Heat And Control South Asia Pvt. Ltd.

Heat and Control, one of the world's leading manufacturers of food processing and packaging equipment, will once again be showcasing their superiority in processing and packaging machines at the IntelPack-2012.

We design, engineer and build the machinery that creates and packages prepared meats, poultry and seafood, french fries, baked and fried snacks, and other quality foods. Our equipment operates around the clock, around the world, giving our customers

the advantages they need to succeed in today's competitive markets.

Rishi Packaging

Since last 23 years we have been manufacturing different types of packaging machinery. Numbers of customers have shown their appreciation after using our machines. After our long experience in the line step by step we start new products manufacturing by using our latest technology & up gradation (R&D) for the best interest of the customers.

coding model for registration printing information for manufacturers packaged goods to code information's like B.No., Dt. Of Mfg., Expiry Date, Prices & Other

statutory information on L. D., P.P., H.M., Laminated Pouches(Polyester Pouch), Alu. Foil, Bag, Tin, Boxes, Labels, Bottles, corrugated carton, Hessian(Gunny)/Paper Bags, HDPE Woven/Non-Woven Sacks, Wooden Case/ Wooden Crate, Plywood, Metallic/ Plastic Drums/ Barrels/ Sheets/ Rubber etc.

Meet us at Booth No. P-6

Qingzhou Baofeng Coating Technique Co., Ltd., China

Qingzhou Baofeng Coating Technique co., Ltd. is a professional designer and manufacturer of high vacuum metallizer machine for flexible substrate as PET, BOPP, CPP, PVC and PE, locating in the beautiful cultural city with long history-Qingzhou, Shandong.

Our company have the professional design group. Our metallizer absorb the advantages of metallizing technique so that it has the advantages of high speed, high

efficiency, stable, reliable and high cost-effective.

The leading products of our company: induction heating style metallizer, free span metallizer and coating drum

metallizer. With high efficiency, reliable, stable performance and low energy cost, our high vacuum metallizer can fulfill the request of high grade flexible package, tobacco package, hologram, hot stamping, clothing decoration and metallic yarn. It is the best choice for the new projects investment and the coating industry equipment replacement as well.

Meet us at Booth No. J-4

S.V.Modular Conveyors Pvt. Ltd. Pune

S.V.Modular Conveyors Pvt. Ltd. Pune, a leading manufacturer of conveyors and related systems, is a part of S.V.Group of companies. The company provides conveying solutions to food, pharma, automotive, packaging, automation, appliances and warehousing.

The company presents automatic pallet wrapping robot 'Leonardo' for end line packaging, a semi-automatic machine able to wrap objects on pallet with stretch film. The machine turns around the product to be wrapped, driven by a contact wheel, and during the rotation, by a reel carrier placed on a telescopic mast, wrap the object for all its height.

Some specific features of Leonardo-

- Reduces the working area further than most available robots.
- Hassle-free handling and operation in smallest of areas.
- Fitted as standard-compatible with plastic films of various qualities.
- 6 exclusive pre-programmable memorized settings.
- Negligible running cost: No fill-Rechargeable from standard 220 Volt power supply in any place.
- No parts to be assembled-"Ready 2 Wrap"

The company also provides a range of robot with telescopic beam for height adjustment for wrapping the pallets.

Meet us at Booth No. K-31

Nordson Corporation

Nordson Corporation is the world's leading Precision Dispensing Equipment. Nordson systems apply Adhesives, Sealants and Coatings to a broad range of consumer and industrial products.

Nordson application and verification technology helps produce many types of containers and is also involved in labeling and sealing applications. From cartons and boxes to envelopes to labels, Nordson adhesive solutions efficiently apply adhesives to meet both form

and function. Packaging and converting applications are often judged equally by how they look and how well they perform, so application systems must apply the right amount of adhesive to be structurally sound and without messy stringing, tailing or squeeze out. Whether using hot melt or cold adhesives, Nordson is a world leader in packaging and converting application technology.

Meet us at Booth No. K-6

B&R Industrial Automation Pvt. Ltd

Bernecker & Rainer Industrie-Elektronik is an Austrian multinational engaged in manufacturing, sales and service of Industrial Automation products.

B&R has earned the distinction of being an outstanding technology solution provider for control and automation. B&R systems and products are the latest in technology, most cost effective and highly reliable. B&R has a close knit network of operations in about 50 locations across the world. This brings with it expertise most needed for being competitive in the global market.

B&R is present in India at your service for last 12 years. We are a 100% owned subsidiary of B & R, Austria. We are headquartered at Pune in India, in our own premises with the latest facilities, with stocks. Our other locations are at Ahmedabad, Bangalore, Baroda, Chennai, New

Delhi & Mumbai. During last 10 years we have earned a name as reliable automation partner in India as well. The partner term arrives from our approach to the user. We keep your technical information water tight. This ensures the secrecy of your technology. B&R India sources its products directly from the ultra modern factory in Austria and supplying to you at your location. The stocks are at our Pune location. The software and services will be provided by our professionals in India.

B&R India is closely linked to the headquarters at Austria and all other

B&R locations across the world. This link ensures that the latest technical information is available online at all locations. It also ensures that service resources can be mobilised from the most appropriate strategic location for the best response to you.

All this therefore means that the products and technology being used by leading machine manufacturers in Europe, Asia & USA are available to you in India today.

B&R in India offers at your doorstep the following:

- World class hardware at competitive prices
- Latest solutions from worldwide experience
- Comprehensive services to support your operations
- In-depth training.

We wish to be the complete automation partner to you.

Interlabel Industries India Pvt. Ltd.

Interlabels is incorporated in 1983, and since then have grown strength to strength in the global labeling arena, delivering Total Labeling Solutions.

We cater to all the following industrial Segments: Pharmaceuticals, Lubes, Cosmetic, Toiletries, Food, Edible Oils, Electricals, Electronics, Engineering, Automotive, Packaging etc. We provide High Quality, Cost Effective and Customized Solutions for all kind of labeling needs, along with guaranteed top performance and reliability.

On Show at IntelPack-2012:
Automatic Label Applicators & Hologram Applicators: Capable of handling all kind of label applications. Machines manufactured in India at Mumbai and are totally Indigenous Machines. We also manufacture Automatic Hologram Applicators for applying Hologram with a high speed.

Print And Apply Systems: Enables variable data printing on labels (bar code, product name, batch no. Mfg. Date, etc...) prior to application on substrate, system integration for tailor made requirements across all industries.

Label Dispensers: For automatic

label dispensing self adhesive roll form labels, for achieving high speed, convenience, and reliability.

Our other product range includes: Self-Adhesive Labels. Bar Code – Solutions, and Hand Labellers

Meet us at Booth No. J-2

Sanjeev Flexi Pack Pvt. Ltd.

SFPPL is one of the fastest growing companies in the flexible packaging industry today. Based in the commercial capital of India, Mumbai, SFPPL has its presence in countries including India, Tanzania, Kenya, Burundi, UAE, Gulf, Bahrain, UK, Mauritius and USA, spanning a wide variety of industries like food & FMCG, pharma, Agriculture & chemicals, engineering and many more.

We are recognized and highly respected as an organization that is quality focused and service oriented by all our clients. Sanjeev Flexi Pack PVT. LTD was started in the year 2001, by Mr. Sanjeev Shah, with extremely humble beginnings. SFPPL entered the flexible packaging industry, when it was still in its nascent stage. While there were many players in the market at that time, it was evident that the industry lacked innovation and customized solutions. Moreover, the packaging product and designs were highly flawed.

This compelled the pioneer, Mr. Sanjeev Shah, to think of alternative ideas and solutions to ensure that flexible packaging was more customer and end-user oriented. The thought to adopt transformational methodologies for flexible packaging, thus found a platform for actualization.

Over the years, SFPPL has adopted modern printing technology, conducted extensive research and developed highly evolved products in the field in flexible packaging. Several of our clients not just come to us for their packaging solutions, but also consult us for designing and creating unique and customized flexi-packaging solution.

Meet us at Booth No. K-1

Sensograph Packaging Technology Pvt. Ltd.

We are pioneer & specialized in manufacturing "weigh" filling machines. The VFFS machine (Collar or Former) with weigh filling system

can virtually handle all type of free flowing granular solids such as tea powder, dry fruits, rice / pulses, mixture, potato wafers, kurkure and even vermicelli.

To emphasize ease of operation of our machines, we proudly call it "EASY PAC", "SMART PAC" & "SMART AUTO" we have "SURE PAC" machines for sticky powders, Atta, spices, which is an Auger Weigh filling system. Besides this, Quick Pac machines are conventional mechanical FFS & volumetric filling machines for small gramages.

We have specially designed Semi Automatic & Fully Automatic packing machine for namkeen, cheese balls & wafers etc. which is kept on display in the exhibition.

Meet us at Booth No. G-9

CST Sensors India Pvt Ltd

Custom Sensors & Technologies (CST) is a specialist in sensing, control and motion products. Through its brands, BEI Kimco, BEI Sensors, BEI PSSC, Cruzet, Crydom, Kavlico, Newall and Systron Donner Inertial.

CST offers customizable, reliable and efficient components for mission-critical systems in Aerospace & Defense, Transportation, Energy & Infrastructures, Commercial & Industrial OEMs, Medical, Food & Beverage and Building Equipment markets.

All CST teams are deeply customer focused, continually striving to exceed customer expectations. They always look for a strong alliance with customers, develop proactive cooperation and ensure transparent relationships.

- CST focuses all its effort in providing the best components and services to fit customers "mission critical" systems.

- Capable of meeting the most demanding specifications and standards, even in harsh environments, CST is certified to supply challenging industry sectors such as aerospace, nuclear, automotive, train, medical and oil & gas.

- Always mastering advanced technologies while capitalizing upon well proven solutions, CST designs, manufactures and delivers the highest quality products and provides strong engineering support and adaptation capabilities.

Shako Flexipack Pvt. Ltd.

We would like to introduce ourselves as a leading flexible packaging company in Western India. Our laminates and pouches for all kind

food products give excellent aroma & moisture barrier there by giving an extended shelf life to your products

Shakoflex Barrier Laminates have been widely used and approved by leading Pharmaceuticals/Food/Ready-mixes/Spices/Tea/Snack Foods/Biscuits/Pickles/Cosmetics etc manufacturers in the country.

Citronix

Citronix specializes in the design and manufacture of continuous ink jet printing technology for applying identifying marks, sell-by dates, and lot / date codes to almost any kind of material or surface. The Citronix team have collectively been providing innovative, forward thinking industrial ink jet designs for over 20 years. Citronix is represented in India by Ace Finepack Pvt. Ltd., Kochi, Kerala State.

Citronix products are used in a wide range of applications, primarily food, and beverage industries, but can also be found in the paper, household,

Our Popular Range of Products and On Show at IntelPack-2012 is as follows: Center Seal, Side Gusseted, Pillow, 5 Kg Jumbo Bags, Vaccum & Nitrogen Flushable Pouches / Laminates, Un-Printed Stand Up Pouches, Al-Foil Based High Barrier Pouches & Laminates, Spouted Pouches, Induction Wads

Meet us at Booth No. M-24

pharmaceutical, automotive, lumber and postal industries. Wherever there is a need for high quality, dependable equipment to print lot/date codes or identity marks, Citronix products can meet the requirement.

Sales and support for the Citronix products are generated through a network of factory authorized and trained distributor partners. These organizations are established companies with many years of experience promoting, and servicing marking and coding equipment. Citronix is represented in over sixty (60) countries throughout the world.

Meet us at Booth No.

Sanket Packseal Machines Pvt. Ltd.

Sanket Packseal Machines Pvt. Ltd., A Leading Name In The Packaging Machines For Any Specific Requirements. i.e. PVC Labels, Security Holograms Cap Sleeves, Food & Non Food Products, Powder, Cosmetics, etc. These Machines Are Running Successfully All Over India & Being Exported World Wide and Packing Various Products.

In Packaging Industry Mr. Kumar Kharat is contributed his efforts from last 18 years. Mr. Kumar Kharat the chairman of Sanket Packseal Machines Pvt. Ltd. has started his career since 1986. After educational life he had jointed with packaging industry. During his job he was impress from Packaging Market & Uses of Packaging Item & Requirement of

Packaging Material. But that time very Limited Equipments were in market for manufacturing & converting of packaging material. So he thought to manufacture packaging equipments those help to make Quality packaging Material and as well as Improvement of Quantity. As per his field experience which practical problem in operation of packaging process and critical to operate of machines. He has Developed & Designed Simple Operation, High Speed Machine.

We Offer You a Packing Line Having Higher Efficiencies, Reliability & Easy Changeover. We are Proudly Introducing Servo Package In Pouch & High Speed Label Machines.

Meet us at Booth No. L-39

Aurum Packaging Systems Pvt. Ltd.

Since incorporation in 1988, Aurum Packaging Systems Pvt. Ltd. is one of the leading suppliers of Automatic Packaging Machinery applicable in Consumer Goods, Pharmaceuticals, Healthcare, Breweries, Chemicals, Agro, and Oil etc.

Aurum has done more than 150 installations of Sleeving Machines & Shrink Tunnels all across India and abroad. The Sleeving Systems supplied by Aurum are very much appreciated by United Spirits Limited, Johnson & Johnson, Zydus Wellness, HUL, Emami and many more.

Aurum's Sleeving System is used for:

1. Pilfer Proofing the Caps (Cap Sleeving)
2. Decorating the Bottle / Containers (Sleeve Labelling)

These machines can run upto 240 BPM, depending upon the size and shape of the bottle and sleeve.

Meet us at Booth No. H-21

Tecknokrat Projects & Equipments Pvt. Ltd.

TECHNOKRAFT is in the packaging machinery manufacturing since 1992. The company's main activity is focused around bringing globally accepted practice of automation in the packaging sector and specifically end of line packaging. We manufacture system that even though utilizes globally known brand that are indigenously available, and proven Control system components, and OEM spares.

We have in house design section which is equipped with 2d /3d software and simulation suits. We will be displaying some of our latest products

Offerings in automatic and semi automatic range like Pail Dispensing, Case forming along with Audio visuals of bigger systems for filling, lid placing ,case packing by pick and place and conveyors

Meet us at Booth No. J-6

Saicom Systems

Saicom Systems is a medium size company in the business of Barcode Systsms, Manufacturing, designing,

standards with a back-coating that extends printhead life by protecting against static. We have wide range of

pre-press of Self-adhesive labels, tags in roll form up to 8 Colors UV printing on Flexographic Rotary Label Printing Presses. Saicom Systems promises its customers "the labels you want when you need them," and our mission is to deliver on that promise by providing the range of label & tags to customer in time, it has Service Department of its own to support customers and to create long-term customer relationships for Saicom Systems.

In Self-adhesive labels we manufacture everything you need to stick on your products. We manufacture labels in roll and sheet form including Plain Barcode Labels, Product & Pharmaceutical Labels, Food & Beverage Labels, Drum & HDPE Labels till 8 colors UV varnished and laminated on Paper, PVC, Polyester, Clear films, Polyester tags and Paper Tags. Security Labels like Destructive, Void and Scratch labels are supplied by us. We sell digital color label printers, barcode label printers, label printing supplies, and label printing services to manufacturers, processors, and retailers.

We serve many industries, and we have a range of products and prices to meet every demand Did you know we were first in India to convert ribbons from jumbo roll to finished roll! Aspeage manufactures and sells the largest variety of ribbons in the industry. All of our ribbons are manufactured to consistent quality

Thermal Transfer Ribbons in black and colors of wax, wax/resin, resin, premium resin and special resin formulation.

Sevana Trades & Services Pvt. Ltd.

Sevana Trades & Services Pvt. Ltd., a ISO 9001 :2008 certified Company was incorporated in the year of 1994 as a private limited company as the marketing and servicing arm of "Sevana Group" of company's. The company has Its corporate office geographically located in Cochin, the economic capital of the southern state of Kerala in India. Sevana Group is in the packaging industry since the year 1984.

The company is in the business of packaging machines and materials since its inception. The company is serving to the ever-growing customer

There are several distinct advantages to induction sealing, such as, Tamper evidence – Deter Pilferage, Leak Prevention – No rejection, hence enhanced profits, Increased Shelf Life – Product freshness, Assurance to the end user – Win your customer's confidence, A sealed product is perceived to be safe and hygienic.

On Show at IntelPack-2012: Automatic Induction Sealing Machine (SS), Automatic Induction Sealing Machine (AL), Semi- Automatic Induction Sealing Machine, Hand held Induction Sealing Machine

Meet us at Booth No. P-7

demands of packaging machines and materials in the country, now the name "SEVANA" is synonymous with the "Quality Packaging Supply" in the country.

The company is the pioneer suppliers of over 90 models of various packaging machinery in the country. The range of products Includes Hand, Foot & Mobile sealers, Dry ink coders, Pedal sealing machines, Bed sealers, Foil sealers, Band sealers, Box Strapping machine, Carton Taping machine, Coding machine, Induction sealer, & Hand wrapper, Gravimetric weighing machine, Vacuum Machines, CIJ printers etc.

IMA-PG India Private Limited

IMA-PG India Private Limited (Formerly known as Precision Gears Ltd.), India, coVacuum Forming, Blister Packing Machines for the Pharmaceutical Industry in 1978 under Technical Collaboration of Hassia Verpackung Maschinen GmbH of West Germany.

Now with over 33 years experience, the Company has made significant developments in the field of Thermoforming with special emphasis on catering to the demands and needs of the Pharmaceutical Industry.

Since then with

major emphasis on its own research and development & continuous interaction with the end user has led to many value added products being launched from time to time.

IMA-PG India Private Limited is zealously committed towards providing

simple solution to the complex requirements which is reflected in solutions that have worked for realizing novel packaging for innovative products, which at times is critical for product stability and it's success in the market. In June 1995 Precision Gears Limited became a subsidiary of IMA, Italy, a turning point in the history of Precision Gears.

Collaboration with IMA SpA, today, has led to many technological transfers from IMA to IMA-PG. This has paved path for launch of multiple and versatile product in the existing range and in the ranges which were not with IMA-PG earlier. The latest addition to this is PG-T60 compact and GMP Design Tube filling Machine in line with CoMaDis.

alStrut

alStrut brings you a complete range of plastic-chain modular MODU conveyors. These conveyors are designed with 7 different types of plastic-chains, traversing on aluminium beds or stainless steel beds, depending on the end application. The conveyor widths range from 63 mm to 220 mm. All conveyors are easily assembled with regular hand tools.

Besides the standard chain, the plastic chains come in various variants including friction chain, finger gripper chain, box gripper chain, wedge gripper and cleated chains. These variants may be selected to transport different types of products for specific

applications. Alpine Conveyors (or spiral conveyors) can be used for accumulation of products where space may be a constraint. Box Gripper Chains can be used to transport products vertically, hence making effective use of the factory floor.

Some of the industries where these conveyors find variety of applications include Personal Product Manufacturing (Shampoo, Soaps, Detergents, Creams, Tooth Paste etc.), Food & Packaging Industry (Tea, Soft Drinks, Confectionery, Biscuits, Yogurt, Milk Powder, Instant Food etc), Tobacco, Paper Converting, Auto Component, Electrical & Electronics amongst many others.

alStrut can provide turnkey solutions, including supply, erection, controls, PLC and commissioning of the system depending on the end application.

USP Packaging Solutions Private Limited

USP Packaging Solutions Private Limited - an organization headquartered in Chennai, Southern India - was incepted in the year 2001 as a consultancy outfit with the prime objective of providing effective solutions to the Indian packaging industry in the field of product coding and marking.

Modest beginnings saw USP tide over the initial 4 years of its operations in the

industry, until, in the year 2005, SIMACO GmbH of Germany - a world leader in industrial marking fluids - appointed the Company as a distributor (and, eventually, the sole

distributor for the SAARC region) for its world-class SIMACOLOR range of products.

Thus began USP's meteoric growth that has led the Company to what it is today - over 2200 installations that feature printers like DOMINO, IMAJE and WILLET which smoothly run on SIMACOLOR fluids. This apart, USP provides complete solutions, technical support, post-sales service and spares to the industry through supply/ servicing of printers and accessories.
